

OUR PRIORITY: FIREFIGHTER SAFETY & PEACE OF MIND

Continental's NEW Special Ops Gear Dryer safely and quickly dries turnout gear, special ops suits, helmets, gloves, boots and hoods.

NFPA compliant, the Special Ops Gear Dryer accommodates multiple sets of gear simultaneously and returns them to service in hours, not days.

Best suited for fire departments handling firefighting, swift-water and ice rescues, the Special Ops Gear Dryer features 12 drying ports to quickly dry gloves, helmets and balaclavas. Four stickmen are adjustable in length to fit different sized suits and can be inverted for drying special ops gear upside down. Each optional boot tree dries four pairs of soaked boots!

Continental ExpressDry Gear Washers and Gear Dryers ensure turnout gear is properly cleaned, dried and quickly returned to service! Visit www.continentalgirbau.com/firedepartments or call (800) 256-1073 to learn more.
